

PRODUCT QUICK CARD

Managed Database Security

Benefits

Trustwave Managed Database Security is ideal for organizations that:

- Need enterprise database security, but don't have the staff to deploy and manage a new solution
- Need 24x7 database activity monitoring and alert handling

Eradicate database threats with Trustwave DbProtect, managed by our analyst-recognized security experts.

DbProtect is a database security and risk management platform that helps organizations secure their enterprise databases and big data stores wherever they reside.

How We Help

- Trustwave will implement and configure your scanning and monitoring policies, maintain and manage scan scheduling and provide real-time database activity monitoring based upon your business requirements.
- Trustwave can help you get the most out of your database security investment by managing DbProtect for you.

The following Managed Database Security service options are available:
